Appendix – Resources

For the programming of this project, I found that the official processing language reference page contained most of the information I needed to know for the project. https://processing.org/reference

In addition to this, I used the Java Documentation form Oracle for the Polygon, File, and Desktop, to show me how to use these classes properly in the program.

https://docs.oracle.com/javase/7/docs/api/java/awt/Polygon.html

https://docs.oracle.com/javase/7/docs/api/java/awt/Desktop.html
